INOUE RUBBER (THAILAND) PUBLIC COMPANY LIMITED

CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

30 SEPTEMBER 2023

## **Independent Auditor's Report**

To the shareholders and the Board of Directors of Inoue Rubber (Thailand) Public Company Limited

## My opinion

In my opinion, the consolidated financial statements and the separate financial statements present fairly, in all material respects, the consolidated financial position of Inoue Rubber (Thailand) Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial position of the Company as at 30 September 2023, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

#### What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 30 September 2023;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include significant accounting policies and other explanatory information.

## Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

## Key audit matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### Key audit matter

## How my audit addressed the key audit matter

#### Allowance for slow-moving inventories

Refer to Note 4.5 (accounting policies) and Note 12 (inventories), allowance is made for slow-moving inventories.

As at 30 September 2023, the gross amounts of inventories in the consolidated and separate statements of financial position were Baht 646.57 million and Baht 643.36 million, respectively. The allowance for slow-moving inventories was equally Baht 4.87 million.

The valuation of inventories was an area of focus because inventories were significant to total assets and the allowance for slow-moving inventories was subject to management's judgement and experience and market situation.

The Group recorded allowance for slow-moving inventories, where necessary. The assessment for the allowance for slow-moving inventories required a degree of estimation from judgement. Management has applied their assessment on their experience and historical data. Each category of inventory with no movement longer than the ordinary course of business was subject to 100% allowance. The level of the allowance was assessed by taking into account the historical and recent sales experience, the aging of inventories and other factors that affected slow-moving inventories.

I performed the following procedures:

- Updated my understanding of the Group's assumptions used to develop the allowances for slow-moving inventories and determined that the accounting policies were consistent with prior years.
- Assessed the reasonableness of management's assumptions used in developing the allowances for slow-moving inventories by considering historical data and experience including key inventory ratios.
   I also challenged management's assumption of specific periods as to whether they were appropriately used in determining the valuation of inventories.
- Tested the reliability of the inventory aging report that was used by the management to assess the valuation of the allowance by tracing the last movement date of the inventory aging report to the supporting documents in order to confirm that inventories were assigned to the correct aging category by the system.
- Tested the mathematical accuracy of the allowance of the slow-moving inventories derived from management's assumptions. No material variances arose from performing this work.

Using the above procedures, I determined that management's assumption was properly applied. In addition, the estimation of the allowance for slow-moving inventories were applied appropriately.

#### Key audit matter

#### How my audit addressed the key audit matter

# Measurement of investment in equity instrument at fair value through other comprehensive income

Refer to Note 4.6 (accounting policies), Note 6 (fair value) and Note 11 (financial assets and financial liabilities), the Group has chosen to measure the investment in non-listed equity instrument at fair value through other comprehensive income.

As at 30 September 2023, the fair value of investment in equity instrument measured at fair value through other comprehensive income in the consolidated and separate statements of financial position was equally Baht 82.74 million.

Measurement of the investment in equity instrument at fair value through other comprehensive income was an area of focus because the equity investment was a significant part of total assets. Also, management's judgement was used to determine the valuation technique and the assumptions were based on unobservable inputs.

The Group applied discounted cash flows from dividends technique to determine fair value of equity instruments, which classified as financial assets measured at fair value through other comprehensive income. Significant unobservable inputs are risk- adjusted discount rate, estimated based on public companies' weighted average cost of capital, which in the Group's opinion, they are in comparable financial position with the contractual counterparty, and future revenue growth rate, which were based on management's judgement and experience, historical data, current conditions and forecasts.

I performed the following procedures:

- Updated my understanding of the Group's valuation technique and assumptions used to measure the investment in non-listed equity instrument measured at fair value through other comprehensive income.
- Assessed the appropriateness of management's valuation technique and the reasonableness of assumptions used in determining the fair value by considering historical data or observable external data of companies in the same industry of the contractual counterparty.
- Engaged an internal valuation expert to evaluate the appropriateness of the risk-adjusted discount rate by comparing to public companies' weighted average cost of capital that are in the same industry. They were determined to be within an acceptable range.
- Tested the mathematical accuracy of the measurement of the investment in equity instrument at fair value through other comprehensive income derived from management's assumptions. No material variances arose from performing this work.

Using the above procedures, I determined that management's valuation technique to measure the investment in equity instrument at fair value through other comprehensive income and their key assumptions were acceptable.

## Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

#### Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRSs, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group's and the Company's financial reporting process.

#### Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
  activities within the Group to express an opinion on the consolidated financial statements. I am responsible
  for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

#### 1 General information

Inoue Rubber (Thailand) Public Company Limited ("the Company") is a public limited company which listed on the Stock Exchange of Thailand. The Company is incorporated and domiciled in Thailand. The addresses of the Company's registered offices are as follows:

Head office: No. 258, Soi Rangsit-Nakornnayok 49, Prachathipat sub-district, Thanyaburi district, Pathumthani.

Branch office: No. 157, Moo 5, Phaholyothin Road, Lamsai sub-district, Wangnoi district, Pranakorn Sri Ayutthaya.

For reporting purpose, the Company and its subsidiaries are referred to as "the Group". The details of the Company's subsidiaries are disclosed in Note 13.

The principal business operations of the Group are summarised below:

The Company is principally engaged in the manufacture and distribution of motorcycle tires, tubes, and industrial elastomer rubber parts.

Kin No Hoshi Engineering Company Limited, a subsidiary, is principally engaged in the manufacture, repair and modification of metal molds and equipment for production of motorcycle tires, tubes, and automotive rubber parts.

IRC (Asia) Research Limited, a subsidiary, is principally engaged in the research and development of motorcycle tires, tubes, and automotive rubber parts.

These consolidated and separate financial statements were authorised for issue by the Board of Directors on 24 November 2023.

## 2 Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards ("TFRSs") and the financial reporting requirements issued under the Securities and Exchange Act.

The consolidated and separate financial statements have been prepared under the historical cost convention except as disclosed otherwise in relevant accounting policies.

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 7.

An English version of the consolidated and separate financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

## 3 New and amended financial reporting standards

3.1 Amended financial reporting standards that are effective for accounting period beginning or after 1 January 2023 and have significant impacts to the Group

Certain amended financial reporting standards have been issued that are not mandatory for current reporting period and have not been early adopted by the Group. These standards are not expected to have a material impact on the Group.

- a) Amendment to TAS 16 Property, plant and equipment clarified to prohibit entities from deducting from the cost of an item of PP&E any proceeds received from selling any items produced while the entity is preparing that asset for its intended use.
- b) Amendment to TAS 37 Provisions, contingent liabilities and contingent assets clarified that, in considering whether a contract is onerous, the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling the contract. Before recognising a separate provision for an onerous contract, the entity must recognise any impairment losses that have occurred on the assets used in fulfilling the contract.
- c) Amendment to TFRS 9 Financial Instruments clarified which fees should be included in the 10% test for the derecognition of financial liabilities. It should only include fees between the borrower and lender.

## 4 Accounting policies

## 4.1 Principles of consolidation

#### a) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group until the date that control ceases.

In the separate financial statements, investments in subsidiaries are accounted for using cost method. Historical cost also includes direct attributable costs of investment.

A list of the Company's subsidiaries is set out in Note 13.

## b) Transactions with non-controlling interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A difference between the amount of the adjustment to non-controlling interests to reflect their relative interest in the subsidiary and any consideration paid or received is recognised within equity.

# c) Intercompany transactions on consolidation

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

#### 4.2 Foreign currency translation

## a) Functional and presentation currency

The financial statements are presented in Thai Baht, which is the Company's and the Group's functional and presentation currency.

## b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or the date of revaluation where items are re-measured.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Any exchange component of gains and losses on a non-monetary item that recognised in profit or loss, or other comprehensive income is recognised following the recognition of a gain or loss on the non-monetary item.

#### 4.3 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less.

#### 4.4 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 - 120 days and therefore are all classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables is disclosed in Note 4.6 f).

#### 4.5 Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost of inventories is determined by the moving average method. Cost of raw materials comprise all purchase cost and costs directly attributable to the acquisition of the inventory less all attributable discounts. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and directly attributable costs in bringing the inventories to their present location and condition.

#### 4.6 Financial assets

#### a) Classification

The Group classifies its debt instrument financial assets in the following measurement categories depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Group has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

#### b) Recognition and derecognition

Regular way purchases acquires and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

#### c) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest (SPPI).

#### d) Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the financial assets. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Financial assets that are held for collection of contractual cash flows where those
  cash flows represent solely payments of principal and interest are measured at amortised cost.
  Interest income from these financial assets is included in other income using the effective interest
  rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and
  presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses
  are presented as a separate line item the statement of comprehensive income.
- FVOCI: Financial assets that are held for i) collection of contractual cash flows; and ii) for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income (OCI), expect for the recognition of impairment gains or losses, interest income using the effective interest method, and foreign exchange gains and losses which are recognised in profit or loss. When the financial assets is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income is included in other income. Impairment expenses are presented separately in the statement of comprehensive income.
- FVPL: Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises,

#### e) Equity instruments

The Group measures all equity investments at fair value. Where the Group has elected to present fair value gains and losses on equity instruments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as dividend income when the right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of comprehensive income.

## f) Impairment

The Group has 3 types of financial assets that are subject to the expected credit loss model:

- Cash and cash equivalents
- Trade and other receivables
- Investments in debt instruments measured at fair value through other comprehensive income (FVOCI)

#### Cash and cash equivalents

While cash and cash equivalents are also subject to the impairment requirements of TFRS 9, the Group's management considered that the identified impairment loss on cash and cash equivalent was immaterial.

#### Trade receivables

The Group applies the TFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

The expected loss rates are based on the payment profiles of sales over a period of 60 months before 1 October 2022 and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information, considering the most relevant factors.

Impairment losses (and reversal of impairment) on trade receivables are recognised in profit or loss included in administrative expenses.

Other financial assets carried at amortised cost and FVOCI

For other financial assets carried at amortised cost and FVOCI, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing expected risk of default as at the reporting date and estimated risk of default on the date of initial recognition.

The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following factors:

- · probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as at the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss as a separate line item included in administrative expenses.

## 4.7 Investment properties

Investment properties, principally land and office buildings, are held for long-term rental yields and are not occupied by the Group.

Investment properties are measured initially at cost, including directly attributable costs and borrowing costs.

Subsequently, they are carried at cost less accumulated depreciation and impairment.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group. The carrying amount of the replaced part is derecognised.

Land is not depreciated. Depreciation on other investment properties is calculated using the straight-line method to allocate their costs to their residual values over their estimated useful lives, as follows:

Land improvements
Building and building improvements

10 years 5 - 20 years

#### 4.8 Property, plant and equipment

All other property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses.

Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group. The carrying amount of the replaced part is derecognised.

All other repairs and maintenance are charged to profit or loss when incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

| Land improvements                        | 10 years     |
|--|--------------|
| Building and building improvements       | 5 - 20 years |
| Machinery                                | 2 - 20 years |
| Tools and factory equipment              | 5 years      |
| Furniture, fixtures and office equipment | 3 - 5 years  |
| Motor vehicles                           | 5 years      |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains or losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

## 4.9 Computer software

Acquired computer software is measured at cost. These costs are amortised over their estimated useful lives of 3 - 10 years.

Costs associated with maintaining computer software programmes are recognised as an expense as incurred.

#### 4.10 Impairment of assets

Assets that have an indefinite useful life are tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. Assets that are subject to amortisation are reviewed for impairment whenever there is an indication of impairment. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

#### 4.11 Leases

Leases - where the Group is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- · variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- · the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- · any initial direct costs, and
- · restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise office equipment.

Leases - where the Group is the lessor

Rental income under operating leases (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognised as expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature.

## 4.12 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

#### Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

#### Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised
- investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates of the period in which temporary difference is expected to be reversed, based on tax rates and laws that have been enacted or substantially enacted by the end of the reporting period.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

#### 4.13 Employee benefits

a) Short-term employee benefits

Liabilities for short-term employee benefits such as wages, salaries, paid annual leave and paid sick leave, bonuses, and medical care that are expected to be settled wholly within 12 months after the end of the period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

b) Defined contribution plan

The Group pays contributions to a separate fund on a mandatory basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

c) Defined benefit plans

Amount of retirement benefits is defined by the agreed benefits the employees will receive after the completion of employment. It usually depends on factors such as age, years of service and an employee's latest compensation at retirement.

The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses are recognised directly to other comprehensive income in the period in which they arise. They are presented as a separate item in statements of changes in equity.

Past-service costs are recognised immediately in profit or loss.

## d) Termination benefits

The Group recognises termination benefits at the earlier of 1) when the Group can no longer withdraw the offer of those benefits; and 2) when the entity recognises costs for the related restructuring. Benefits due more than 12 months are discounted to their present value.

#### 4.14 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

#### 4.15 Share capital

Ordinary are classified as equity.

## Treasury share

Where any companies within the Group repurchases its shares, the consideration paid, including any directly attributable incremental costs (net of taxes) is deducted from equity until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity.

## 4.16 Revenue recognition

Revenue include all revenues from ordinary business activities. All ancillary income in connection with the delivery of goods and rendering of services in the course of the Group's ordinary activities is also presented as revenue.

Revenue are recorded net of value added tax. They are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfilment of the obligation to the customer.

## Sale of goods

The Group manufactures and sells motorcycle tires, tubes, and industrial elastomer rubber parts. Sales are recognised when control of the products has transferred, being when the products are delivered, and there is no unfulfilled obligation that could affect the buyer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the buyer, and either the buyer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The products are often sold with retrospective volume discounts based on aggregate sales over a specified period. Revenue from these sales is recognised based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. A refund liability (included in trade and other payables) is recognised for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No significant element of financing is deemed present as the sales are made with a credit term of 30 - 120 days, which is consistent with market practice.

The Group's obligation to repair or replace faulty products under the standard warranty terms is recognised as a provision and cost of sales.

A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

#### Services

The Group recognised service contracts with a continuous service provision as revenue on a straight line basis over the contract term, regardless of the payment pattern.

Contract assets and contract liabilities

A contract asset is recognised where the Group recorded revenue for fulfilment of a contractual performance obligation before the customer paid consideration or before the requirements for billing.

A contract liability is recognised when the customer paid consideration or a receivable from the customer that is due before the Group fulfilled a contractual performance obligation.

For each customer contract, contract liabilities is set off against contract assets.

Financing components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

#### 4.17 Dividend distribution

Dividend distributed to the Company's shareholders is recognised as a liability when interim dividends are approved by the Board of Directors' meeting, and when the annual dividends are approved by the shareholders' meeting.

#### 4.18 Derivatives and hedging activities

The Group is a counterparty in derivatives which are financial instruments, i.e. forward exchange contracts. Derivatives that do not qualify for hedge accounting is initially recognised at fair value. Changes in the fair value are included in other gains or losses.

Fair value of derivatives is classified as a current or non-current following its remaining maturity.

#### 4.19 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker of the Group which includes Chairman, President and Executive Director.

Segment information is presented by business segment of the Group's operations in Note 8.

## 5 Financial risk management

## 5.1 Financial risk

The Group exposes to a variety of financial risk: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain exposures.

The Group's risk management is controlled by a central treasury department under policies approved by the board of directors. Group treasury identifies, evaluates and manages financial risks in close co-operation with the Group's operating units. The board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and other financial instruments as well as investment of excess liquidity.

## 5.1.1 Market risk

#### a) Foreign exchange risk

The Group operates internationally and is exposed to foreign currency risks, primarily the US dollar and Japanese Yen from trading transactions, and purchase of raw materials and machineries that are denominated in foreign currencies. The risk is managed by entering into forward exchange contracts as appropriate. The Group entered into forward exchange contracts with financial institutions of approximately 69.00% of foreign currency transactions to manage the foreign exchange risk.

#### Exposure

The Group's exposures to foreign currency risk as at 30 September 2023 and 2022, expressed in Baht are as follows:

| -  | Consolidated financial statements |                          |                |   |                          |                |  |  |  |
|--|-----------------------------------|--------------------------|----------------|---|--------------------------|----------------|--|--|--|
| •  | 30 \$                             | September 202            | 23             | 30 September 2022                       |                          |                |  |  |  |
| -  |                                   | Japanese                 |                | Japanese                                |                          |                |  |  |  |

|  | Baht                              | Baht                     | Baht           | Baht                                    | Baht                     | Baht           |  |  |  |
| Trade and other receivables                          | 78,515,336                        | 28,410,708               | 1,570,172      |   | 31,733,412               | 1,202,759      |  |  |  |
| Trade and other payables                             | 52,634,580                        | 30,254,495               |                | 79,870,857                              | 77,967,108               | -              |  |  |  |
| •  | Separate financial statements     |                          |                |   |                          |                |  |  |  |
| •  | 30 9                              | September 202            | 23             | 30 September 2022                       |                          |                |  |  |  |
| -  |                                   | Japanese                 |                | • | Japanese                 | -              |  |  |  |
|  | US Dollar<br>Baht                 | Yen<br>Baht              | Others<br>Baht | US Dollar<br>Baht                       | Yen<br>Baht              | Others<br>Baht |  |  |  |
| Trade and other receivables Trade and other payables | 78,515,336<br>52,634,580          | 28,410,708<br>30,254,495 | 1,570,172      | 105,642,945<br>79,870,857               | 31,733,412<br>77,967,108 | 1,202,759      |  |  |  |

## Sensitivity

As shown in the table above, the Group is primarily exposed to changes in Baht to US Dollar and Baht to Japanese Yen exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from financial assets and financial liabilities denominated in US Dollar and Japanese Yen were as follows:

|  | Consol<br>financial st |             | Separate financial statements |             |  |
|--|------------------------|-------------|-------------------------------|-------------|--|
|  | 2023                   | 2022        | 2023                          | 2022        |  |
|  | Baht                   | Baht        | Baht                          | Baht        |  |
| Baht to US Dollar exchange rate - Increase 10%* - Decrease 10%*    | 2,588,076              | 2,577,209   | 2,588,076                     | 2,577,209   |  |
|  | (2,588,076)            | (2,577,209) | (2,588,076)                   | (2,577,209) |  |
| Baht to Japanese Yen exchange rate - Increase 10%* - Decrease 10%* | (184,379)              | (4,623,370) | (184,379)                     | (4,623,370) |  |
|  | 184,379                | 4,623,370   | 184,379                       | 4,623,370   |  |

<sup>\*</sup> Holding all other variables constant

# b) Cash flow and interest rate risk

The Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group is exposed to interest rate risk relates primarily to its deposits at financial institutions and investments in debt instruments. Most of the Group's financial assets and liabilities bear floating interest rates or fixed interest rates which are close to the market rate. However, the Group will use interest rate swap to management the risk when necessary.

Significant financial assets and liabilities classified by type of interest rates and maturity date are summarised in the table as below:

|   |                  |                   |                 | Consolida               | ted financial s | tatements       |                         |               |               |
|---|------------------|-------------------|-----------------|-------------------------|-----------------|-----------------|-------------------------|---------------|---------------|
|   |                  |                   | Maturity        |                         |                 |                 |                         |               | •             |
|   |                  | ed interest rates |                 | Floating interest rates |                 |                 |                         |               |               |

#### c) Price risk

The Group is exposed to market risks as an investor in financial instruments and risks from the financial position of the issuer of the investment instrument. However, the Group has diversified its investments to manage such risks. This is in accordance with the investment policy according to the resolution of the Board of Directors.

The Group's investments in financial instruments are investment units through a private fund managed by an asset management company, focusing on investment in domestic debt securities, both public and private. This entails of investing in government bonds and debentures and incorporating mutual fund investment units domestic debt. The ideal investment period is 2 - 3 years.

Investment policies and frameworks regarding types and proportions of investments through private funds are as follows:

| Type of investment                               | Proportions   |  |  |  |  |
|--|---|--|--|--|--|
| Debentures<br>Collective Investment Scheme (CIS) | A maximum of 70 percent of the fund's net asset value Money Market Fund |  |  |  |  |

#### 5.1.2 Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt instruments carried at fair value through other comprehensive income (FVOCI) and derivative assets as well as credit exposures to customers, including outstanding receivables.

## a) Risk management

Credit risk is managed on a group basis. For banks and financial institutions, only independently rated parties with a minimum rating of 'A-' are accepted.

The Group assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual credit limits are set based on the assessment in accordance with limits set by the board. The compliance with credit limits by customers is regularly monitored by line management.

Sales to retail customers are required to be settled in cash to mitigate credit risk. There are no significant concentrations of credit risk, whether through exposure to individual customers, specific industry sectors and/or regions.

#### b) Impairment of financial assets

Details of the impairment assessment of financial assets are disclosed in Note 4.6 f).

## 5.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities to meet obligations when due. As at 30 September 2023, the Group and the Company had cash and deposits at call with banks of Baht 1,146.13 million and Baht 1,088.06 million, respectively (2022: Baht 897.27 million and Baht 845.98 million) that are expected to generate cash inflows in a short period of time.

Management monitors the Group's cash flows projections by considering cash and cash equivalent. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against regulatory requirements.

# Maturity of financial liabilities

The tables below analyse the Group's financial liabilities into relevant maturity groupings based on their contractual maturities. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

## 5.2 Capital management

#### 5.2.1 Risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amounts of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital based on the debt to equity ratio, which calculated by dividing net debt by equity. The Group's strategy was to maintain an appropriate level of debt to equity. As at 30 September 2023 and 2022, the Group's debt to equity ratios were as follows:

|                      | Consol<br>financial st |               | Sepa<br>financial st |               |
|----------------------|------------------------|---------------|----------------------|---------------|
|                      | 2023                   | 2022          | 2023                 | 2022          |
|                      | Baht                   | Baht          | Baht                 | Baht          |
| Net debt             | 1,103,174,193          | 1,440,319,815 | 1,074,407,797        | 1,410,886,781 |
| Total equity         | 3,929,323,636          | 3,832,030,434 | 3,864,380,937        | 3,766,229,578 |
| Debt to equity ratio | 0.28                   | 0.38          | 0.28                 | 0.37          |

## 6 Fair value

The fair value of financial assets and financial liabilities measured at amortised cost approximates the carrying amount as follows:

| Consolidated | financial | stateme | nts |
|--------------|-----------|---------|-----|

## Separate financial statements

# Financial assets

- · Cash and cash equivalents
- Trade and other receivables, net

#### Financial liabilities

- Trade and other payables
- Lease liabilities

#### Financial assets

- Cash and cash equivalents
- · Trade and other receivables, net

## Financial liabilities

- · Trade and other payables
- Lease liabilities

The following table shows fair values of financial assets and liabilities:

|  | C   | onsolidated and Se  | eparate financ            | ial statements  |  |  |  |  |  |

Fair values are categorised into hierarchy based on inputs used as follows:

Level 1: The fair value of financial instruments is based on the current bid price / closing price by reference to the Stock Exchange of Thailand / the Thai Bond Dealing Centre.

Level 2: The fair value of financial instruments is determined using significant observable inputs and, as little as possible, entity-specific estimates.

Level 3: The fair value of financial instruments is not based on observable market data.

The fair value measurement of financial assets and financial liabilities is in accordance with the accounting policies disclosed in Note 4.6.

## Valuation techniques used to measure fair value level 2

Fair value of foreign currency forward is determined using spot exchange rate reference by commercial banks.

The fair value in level 2 of investments in debt instruments, which are classified as financial assets measured at fair value through other comprehensive income (FVOCI) is based on the current bid price / closing price by reference to the Thai Bond Dealing Centre / the asset management company.

## Valuation techniques used to measure fair value level 3

Changes in fair value in level 3 of unlisted equity instruments which is financial assets measured at fair value through other comprehensive income (FVOCI) for the years ended 30 September 2023 and 2022 were as follows:

|  | Consolidated and Separate financial statements |
|--|--|
| Opening balance as at 1 October 2022<br>Change in fair value | 93,301,607<br>(10,560,432)                     |
| Closing balance as at 30 September 2023                      | 82,741,175                                     |

The following table summarises the quantitative information about the significant unobservable inputs used in fair value measurements of the investment in equity instruments measured at fair value through other comprehensive income (FVOCI).

|   | Fair v<br>Consolid<br>Separate<br>staten | ated and<br>financial |                             | Range of inputs Consolidated and Separate financial statements |           |

## Valuation processes

Chief Financial Officer (CFO), Audit Committee (AC) and valuation teams discuss valuation processes and results at least every quarter.

The Group applies net cash inflow from dividend as valuation technique to determine fair value of unlisted equity instruments. Significant unobservable input of fair value hierarchy level 3 are risk adjusted discount rate, which is estimated based on public companies' weighted average cost of capital that, are in opinion of the Group, in a comparable financial position with the counterparty in the contract and future revenue growth rate, which is estimated based on historical data or observable external data of companies in the same industry.

## 7 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

## a) Fair value of certain financial assets and derivatives

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Group uses judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. Details of key assumptions used are included in Note 6.

## b) Defined retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of assumptions. Key assumptions used and impacts from possible changes in key assumptions are disclosed in Note 20.

#### c) Determination of lease terms

In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the most relevant factors are historical lease durations, the costs and conditions of leased assets.

Extension options on billboard space leases have not been included in the lease liability, because the Group considers 1) the underlying asset condition and/or 2) insignificant cost to replace the leased assets.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstance affecting this assessment occur, and that it is within the control of the Group.

#### d) Determination of discount rate applied to lease liabilities

The Group determines the lessee's incremental borrowing rate as follows:

- Where possible, use recent third-party financing received by the individual lessee as a starting point, adjusting to reflect changes in its financing conditions.
- · Make adjustments specific to the lease, e.g. term, country, currency and security.

## e) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Group's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

Details of the impairment assessment of financial assets are disclosed in Note 4.6 f).

## f) Inventories

Allowance is made, where necessary, for obsolete, slow-moving and defective inventories. The assessment for the allowances for obsolete and slow-moving inventories required a degree of estimation from judgement. Management has applied their assessment on their experience and historical data. Each category of inventory with no movement longer than the ordinary course of business was subject to 100% allowance. The level of the allowances was assessed by taking into account the historical and recent sales experience, the aging of inventories and other factors that affected obsolete and slow-moving inventories. Net realisable value is the estimate of the selling price in the ordinary course of business, less applicable costs of completion and variable selling expenses.

## g) Investment properties, plant and equipment and intangible assets

Management determines the estimated useful lives and residual values for the Group's investment properties, plant and equipment and intangible assets. Management will revise the depreciation and amortisation charges where useful lives and residual values are different to previously estimated, or it will write off or write down technically obsolete or assets that have been abandoned or sold.

# 8 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker of the Group which includes Chairman, President and Director.

The Group's operations principally involve the manufacture and distribution of motorcycle tires and tubes and elastomer products mainly for automobile industry with manufacturing facilities in Thailand and operations in both domestic and overseas markets.

The factor used to identify the Group's reportable segments includes geographical areas. There are two reportable segments i.e. (1) Local and (2) Export.

Financial information of the Group for the years ended 30 September 2023 and 2022 classified by market were presented as follows:

|   | Consolidated financial statements |                          |                          |                          |  |   |  |

<sup>\*</sup> Exclude non-financial liabilities

### 11.1 Financial assets at amortised cost

a) Classification of financial assets at amortised cost

The Group classifies its financial assets as at amortised cost only if both of the following criteria are met:

2,019,377

796,474,375

- · the asset is held within a business model whose objective is to collect the contractual cash flows; and.
- the contractual terms give rise to cash flows that are solely payments of principal and interest.

798,493,752

Financial assets at amortised cost include cash and cash equivalents and trade and other receivables. As at 30 September 2023 and 2022, the Group's financial assets at amortised cost were presented in current and non-current as follows:

|   |                               | C                   | onsolidated fin              | ancial statemen              | ts                  |                              |  |

b) Fair value of financial assets at amortised cost

Due to the nature of cash and cash equivalents and trade and other receivables is current assets, their carrying amount is considered to be the same as their fair value.

c) Allowance for expected losses

Details of the impairment assessment of financial assets are disclosed in Note 4.6 f).

## 11.2 Financial assets measured at fair value to other comprehensive income (FVOCI)

a) Classification of financial assets measured at fair value to other comprehensive income (FVOCI)

Financial assets measured at fair value through other comprehensive income (FVOCI) comprise:

- Investments in debt instruments with contractual cash flows that qualify for principal and interest, and
  has a business model for the purpose of holding such investments in order to receive contractual cash flows
  and to sell.
- Investment in equity instruments, which are not held for trading and the Group has irrevocably elected at
  initial recognition to recognise and the Group measure at fair value through other comprehensive income at
  the date of initial recognition.

As at 30 September 2023 and 2022, the Group has financial assets measured at fair value through other comprehensive income (FVOCI) as follows:

| _  | Consoli<br>financial st |              | Separate financial statements |              |  |
|--|-------------------------|--------------|-------------------------------|--------------|--|

#### Investments in debt instruments

The Group's investments in debt instruments are investment units through a private fund managed by an asset management company, focusing on investment in domestic debt securities, both public and private. This entails of investing in government bonds and debentures and incorporating mutual fund investment units domestic debt. The ideal investment period is 2 - 3 years. Details of the investment policies and frameworks and the Group's price risk management are disclosed in 5.1.1 c).

The movements of investments in debt instruments for the years ended 30 September 2023 and 2022 are as follows:

|  | Consoli<br>financial st |               | Sepa<br>financial st |               |
|--|-------------------------|---------------|----------------------|---------------|
|  | 2023                    | 2022          | 2023                 | 2022          |

| Disposals                                  | (1,022,104,772)         | (388,491,571) | (1,022,104,772)      | (388,491,571) |
| Interest income                            | 7,558,557               | 7,381,700     | 7,558,557            | 7,381,700     |
| Change in fair value                       | 2,384,962               | (2,123,754)   | 2,384,962            | (2,123,754)   |
| Closing balance<br>as at 30 September 2023 | 591,636,304             | 585,604,427   | 591,636,304          | 585,604,427   |

The Group reclassifies any related balance within the fair value through other comprehensive income (FVOCI) reserve to profit or loss when disposing these debt investments.

During the period, the group disposed the partial debt investments and realised a loss on disposal (transferred FVOCI reserve to other expenses of Baht 56,561).

The fair value of debt instruments is based on close market price published by the Thai Bond Market Association as at period-end. The fair value is within level 2 of the fair value hierarchy (Note 6).

## Investment in equity instruments

As at 30 September 2023 and 2022, the Group had an investment in unlisted equity instruments as follows:

|   |   |                          |                            | _                          | Conso<br>and Se<br>financial s | parated                 |

### 11.3 Offsetting financial assets and liabilities

The following table presents the recognised financial assets that are offset and presented at net amount in the statement of financial position:

|  |                   | Separate financia                                  |   |
|--|-------------------|--|---|
|  | Gross amount Baht | Gross amount offset in the financial position Baht | Net amount<br>presented in<br>the financial<br>position<br>Baht |
| As at 30 September 2023<br>Trade and other receivables | 498,719,985       | (40,615,521)                                       | 458,104,464   |
| Total  | 498,719,985       | (40,615,521)                                       | 458,104,464   |

Offsetting arrangements - Trade receivables and payables

The Group gives volume-based rebates to selected customers. Under the terms of the supply agreements, the amounts payable by the Group are offset against receivables from the customers and only the net amounts are settled. The relevant amounts have therefore been presented net in the statement of financial position.

| 12 Inventories, net  |                         |             |                       | ·           |

| Land                               | 13,875,000 | 13,875,000                        | 17,830,500 | 17,830,500      |
| Building and building improvements | 20,095,000 | 20,095,000                        | 25,694,261 | 26,013,761      |
|                                    | 33,970,000 | 33,970,000                        | 43,524,761 | 43,844,261      |

The fair values of investment properties are within level 3 of the fair value hierarchy which used significant unobservable inputs in the valuation technique (Note 6). The fair values of investment properties were appraised by professional independent valuers, who qualified as expert and hold a recognised relevant professional qualification and have recent experience in the locations and categories of such investment properties.

Amounts relating to investment properties recognised in profit or loss were as follows:

|   | Consolidated financial statements |                      | Separa<br>financial sta           |                                   |

As at 30 September 2023, the Group only recognised those deferred tax assets that in the management's judgement were likely to be realised, due to the historical operating profits generated by the operations of the entities within the Group. This is disclosed in the note regarding the gross deferred and income taxes to enable users of the financial statements to understand the nature of the movements in this balance.

As at 30 September 2023, the Group has no tax loss carried forward.

Under the Thai Revenue Code, all entities are taxed as separate entities with no relief available for the Group.

The plans are final salary retirement plans. The level of benefits provided depends on members' length of service and their salaries in the final years leading up to retirement.

The movements in the obligations over the years were as follows:

| -   | Consolidated financial statements      |  | Sepai<br>financial st                  |  |

The above sensitivity analysis were based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method of calculating the retirement benefit obligation recognised within the statements of financial position at the end of the reporting period (present value of the defined benefit obligation calculated with the projected unit credit method).

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The weighted average duration of the retirement benefit obligation was 11.01 years.

Expected maturity analysis of undiscounted retirement benefits as follows

Lease liabilities - non-current portion

Lease liabilities - current portion

Individuals and entities that directly, or indirectly control or are controlled by or are under common control with the Company, including investment entities, associates, joint venture and individuals or entities having significant influence over the Company, key management personnel, including directors and officers of the Company and close members of the family of these individuals and entities associated with these individuals also constitute related parties.

The Company's major shareholders are the Leeissaranukuls group in proportion of 39.51% and Inoue Rubber Company Limited, which is incorporated and domiciled in Japan, in proportion of 35.69%. The remaining 24.80% of the shares are widely held.

In considering each possible related-party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

During the year, the Group and the Company entered into several transactions with its subsidiaries and related parties. The terms and basis of such transactions were negotiated between the parties in the ordinary course of business and according to normal trade conditions.

|   | Terms and basis  |
|---|--|
| Sales of goods  | Market price or cost plus margin according to type of products           |
| Service income  | Cost plus margin   |
| Rental income   | Contract price which is in line with market                              |
| Purchases of raw materials, machinery and metal molds | Prices which approximate to the price charged to a third party           |
| Research and development expenses                     | Prices as agreed in the contract which is near to the market price       |
| Technical assistance fees                             | Prices as agreed in the contract based on percentage of sales            |
| Advertising expenses                                  | Prices which approximate to the price charged nearly to the market price |
| Utility expenses                                      | Price as agreed to the price charged by a third party                    |
| Employee service sharing expenses                     | Prices which approximate to the price charged to a third party           |
