#### **Agenda 8: Other topics (if any)**

No shareholders proposed additional agenda to the Meeting.

After the meeting agendas were completely proceeded, before closing the Meeting, the Chairman gave an opportunity to the Shareholders to express opinions and make inquiries about further questions. Then the Board of Directors and the Executives jointly responded to the inquiries from the shareholders with the following summary;

**1. Why the company's dividend in 2022 decreases from 2021?** It was responded that according to the Company's performance presentation in agenda 2, the profits in 2022 is less than 2021 around 70%. Thus, when the Company maintains the dividend payout ratio at 50% under the lower net profits, the dividend decreases proportionally.

**2. How does the executives forecast about the Company's growth in 2023?** It was responded that in 2023 the Company will remain in the era of VUCA World which is highly uncertain. There will be various risk factors that affect the change of forecast quickly. The key issues in 2023 will be 1.) Geopolitics such as Russia-Ukraine war, Russia's suspension of gas exports to Europe, and fossil energy problem, which will lead to high energy costs and raw material prices; 2). High exchange rate fluctuation: this can be seen from the fluctuation of the baht against the US dollar from 37 – 38 baht during November 2022 to 32 baht at present within a few months; 3.) Higher interest rate that impacts on purchasing power. All these factors will affect Thai economy and the Company's business opportunity in 2023.

However, the Company forecasts that the sales in 2023 will grow 7% following the growth of automotive industry that is expected to grow at 7%, and great outlook of export market in 2023. By the way, it depends on the risk factors as mentioned above.

**3. What is the relation between the rubber price and the Company's performance? How does the current rubber prices affect the Company?** It was responded that the Company's products have high spec especially products that assemble in automotive. The rubber material use must meet the spec of such products for example spec of temperature, oil proof, and ozone resistance that are rarely find in natural rubber property. So if talking about the natural rubber, the Company uses low proportion of it. The change of natural rubber prices hence rarely affect the Company. However, the current natural rubber prices are quite stable.

**4. What is the Company's capacity utilization at present? And if the Company plans to grow, how the investment budget increases?** It was responded that the Company's capacity utilization rate is around 70-80% and is able to grow further. Thus, there is no concern of the capacity utilization to support the sales growth at 7%. However, the Company pays attention on automation system thus the investment budget focuses on the automation system, R&D and innovation creation.

As no one put forward any more comment or inquiry, the Chairman thanked all shareholders for participating and declared the Meeting closed.

The meeting closed at 15.20 hours.
