

Innovative Exhibition: Value-Adding on Natural Rubber

News

19 January 2016

IRC (Asia) Research Company Ltd., led by Chairman, Mrs. Pimjai Leeissaranukul, has taken a participation in exhibition and presented innovative products which add value on natural rubber namely, Rubber Pads for supporting railway infrastructure projects and Rubber Chips for sport track stadium by following the Government's plan. Additionally, the Company has presented the potential products made from natural rubber namely Rubber Fender to the Cabinet at the Government House.

This is the Company's marketing activities coming together with the Government's support on value-adding on natural rubber as aforesaid.
